This game can be compared with The Stanley Parable. Walk around and do what is asked of you... or don't.

As to the gameplay, Payroll is most definitely inferior. Less options, less of a game overall to play.

Graphically while The Stanley Parable is more impressive, Payroll has a fun style that I haven't seen in a while.

As to the achievements, Payroll wins without a doubt. There aren't any achievements, like "Play 24h on a Tuesday" and "Have an erection during the baby minigame". Getting the achievements in Payroll made the game way more fun and it also made my try and figure out what I can even do in the game.

Plus, it's way cheaper than The Stanley Parable.. If you enjoy hidden object games, the Midnight Mysteries series are the best you'll find on Steam. No, they're not as good as the Mystery Case Files series but they're damn good in their own right. Each game have interesting historically based stories with hidden object goodness, mini games and bonus levels. There are even Steam Achievements. I also recommend Sherlock Homes: Hound of the Baskervilles and Season of Mystery: The Cherry Blossom Murders if you're looking for HOG games with Achievements.. Another lovely game :D. Great expansion! For pure single player, you can navigate a campaign on Io, one of Jupiter's Moons, with its harsh environment and uniquely different resource dynamics than Mars (plus Space Elevators!). There's also a competitive single-player mode, the Infinite Map Challenge, which provides an unlimited amount of progressive challenges, with a leaderboard both for the most number of maps completed and for the fastest win on each individual map. Basically, the Infinite Map Challenge lets you compete with other players, but do so at a more relaxed pace than in multiplayer.

For multiplayer, if you own Jupiter's Forge, you can create lobby games on Io, and friends without the expansion can join you and play. Also, owning Jupiter's Forge will allow you to practice the awesome new HQs--the Nomads and the Elites--in skirmishes so that you are prepared to utilize them on the multiplayer ladder.

. Don't Bother, game play is minimal mainly as what is laughingly called a tutorial gives little to no instruction on what it is you're supposed to be doing, on the subject of the "tutorial" it is really badly translated and lacking any helpful content.

Your buildings visually degrade very quickly (like before to end of day 1) and you are given no way to fix them. I also didn't come up with a way of making more cash (at least in the time before I gave up on the game as a bad idea.

The UI is also less than intuitive. I'm just glad I only paid 12p for it from humble bundle. Dungeon Keeper the roguelike sounds great but the necessary complexity just isn't there. The base building part is a really stripped-down Dwarf Fortress. Buildings you're really gonna need are: training posts, fancier training posts, even fancier training posts; libraries, fancier libraries, and even fancier libraries beds, other beds, and yet another beds. Two of three bed types also can be regular, fancy and even fancier. Also four or five types of workshop, which at least don't have fanciness levels, and assorted chests and torches. Traps are somewhat fun, but it's not really a tower defense game. The going-to-war part is a barebones roguelike. Your regular bump combat, with bows, consumables and spells thrown in. Party-based raids are not bad, but they're not that good either.

Basically, if it's not the first game in your life, you've already seen every mechanic that keeperRL can offer. And chances are, you've seen it in a better game. Rimworld or DF for base building; Caves of Qud, Cogmind or DCSS for roguelike exploration and combat.

I love playing this with my 4 and 6 year old. This game is great!. good game value.i like the bowling best, all the games are simple to start and play.there is something for everyone,. This game was very cool! I like the diversity of the levels and their accompanying music which makes a very cool atmosphere. The game is quite hard a gives the player a true challange!. This soundtrack wouldn't be out of place in an epic action flick.. Thoroughly excellent! Deep engaging story-telling and genuine choices with real impact. There are many ways this story can go.. Do you like mazes? Feeling lost? No!?! Well too bad!! I found myself constantly lost, the map system doesn't help at all because it doesn't give you an actual usable map. I was constantly replacing batteries because the game is so dark and they run out very quickly.

This game is just corridors with more doors stabbing at your poor sore brain.  
Play if you want to go mad.

ps~ I played this with my own quick Antimicro config and an xbox one controller but also with "Excision - Virus LP" playing in iTunes. This makes the game much more playable to me. Oh yeah, there is also no sound menu in-game. I cranked up iTunes and dealt with it.. Very boring, very glitchy, and very short.

It's like The Forest except on an island, and not fun.. thiz game iz good, plizzz come inside, but you do not needz zeapons, the zombiez do not wanna hurt you, if you do not bringz zeapons zombiez not attack, I promiz, zombiez hate deliciouz brainz.
